

eCars - Now!

How to mass produce electric cars using modern tech conversions at affordable price

Our mission is to create Open Source conversion plans for the most popular car models. The aim is set high - we are building blueprints for hi-tech modular conversion kits that can be industrially assembled and easily swapped under the hood. With the plans we can negotiate volume purchase orders for kit components.

Anyone is free to use the plans, and convert the cars - or to develop a new form of distribution of the car. Everyone is invited to take part in the future: of car conversion, part suppliers, energy companies, and even small garages. Everyone is invited. Welcome!

www.eCars-Now.org

Community

The Co-op community consists of professional volunteers from many fields. The community can be found at www.ecars-now.org

Foundation

We are starting a tax deductible foundation to support the eCars Community. The eCars Foundation will have 501(c) 3 status.

Fund

An eCars Fund has been established for a Green Technology investment opportunity for companies that supply components or assembly services for the eCars community. The Fund will be a separate entity.

Semi-industrial Mass Conversions

Open Source R&D

Crowdsourced Conversion Library

900+ Million Donor Vehicles

Avoid Billions tons of CO2 pollution

Our Plan

1. Find out how HUGE the demand is
2. Create open source conversion plans
3. Negotiate prices with parts suppliers and conversion shops
4. Introduce customers, converters, and vendors.
5. Jumpstart a mass conversion movement

Our first target is a co-op electric conversion of many Toyota Corollas - or **eCorollas** as we call them..

driving range: 150 km (300 km with an extra battery pack)
chassis: any choice (sedan/hatchback/wagon)
performance: equals an internal combustion engine (ICE)
brakes: car's original + regenerating
security options: car's original
options: can be selected

The price of the 1st prototype is €30 000 euros. Converting hundreds of one make and model will bring the price down to €20 000 euros or even less.

Optional Touch Panel with User Friendly Interface.
